Vlad Rosioru

Software Development | Leadership | Coordination
Bucharest, Romania

Summary

My greatest achievement is that I manage to overcome failure!

- In over 20 years of activity I experienced from development to leadership roles in high-performing Agile teams building scalable C#/.NET solutions with robust CI/CD integration
- Very familiar with SDLC and more or less played a role in each of the phases
- Went beyond my expertise area in my greatest challenge to implement a project which aimed to reduce effort by 80% for migration of industrial automation projects between companies like Siemens, Wago, ABB, Yokogawa
- I have been exposed to multiple cultures, collaborated very well in the past with people from Japan, Netherlands, Germany, US
- For several projects I acted as the link between business and technical by gathering requirements and translate them into user stories with specific technical tasks, acceptance criteria and all the other details
- I understand high level / global objectives and I am experienced in effectively communicating those across team / teams and the other way around: understand execution struggles and I am able to determine viable solutions to successfully reach objectives
- Objective in risk assessment, work well under pressure even with incomplete information and lacking experience in some areas
- Characterized by a certain level of perfectionism, I have a natural attention to details which has been consolidated early in my career

Proficient: .NET, C#, SQL (MS-SQL, PostgreSQL, Oracle), Web Technologies (MVC, REST, SOAP), SDLC, Agile, JIRA

Knowledgeable: Azure, AWP, GCP, Python

Enthusiast: AI - Cursor, Antigravity, Gemini, Copilot, Gordon

Experience

LSEG (London Stock Exchange Group)

2 years 6 months

Software Development Manager

October 2023 - December 2024 (1 year 3 months)

Bucharest, Romania

Local Lead:

- Design and perform interviews for new members in the local team (business analyst, tester, developer)
- Oversee development activities
- Support, guidance and escalation to assure the development activities run smoothly
- Guiding team through the evaluation process, perform evaluations

Global coordination:

- Scrum Master for a global medium size (15-20) development team - organize and facilitate ceremonies; facilitate contact and communication with various related parties
- Change Management - follow a complex ServiceNow process; create release deployment documentation; create GitHub pipelines and assure they run correctly through defined steps; maintain appropriate roles for the team members; hold and facilitate approval meetings to fill the gaps with detailed information
- Report - keep a close contact with higher management to create a transparent environment and align development activities with global goals
- Coordinate a complex migration project from AWS to MS Azure

Tech Stack and Skills:

##Azure ##ServiceNow ##Asana ##Confluence ##Jira ##GitHub

Lead .NET Developer

July 2022 - October 2023 (1 year 4 months)

Bucharest, Romania

- Hands-on implementation of a module (ListAPI) for a bigger solution - Portfolio Management
- Coordination and support for the local team

TECH Stack:

C# .NET Core PostgreSQL Docker Clean Architecture Microservices CQRS
##AWS ##GitHub ##ServiceNow

Qualysoft

1 year 9 months

Software Developer

December 2021 - June 2022 (7 months)

Bucharest, Romania

BNP Paribas

Development Team Lead

October 2020 - November 2021 (1 year 2 months)

Bucharest, Romania

EVOGPS:

- Maintain and improve functionalities for a GPS Tracking solution
- Support and guide the team in improving implementation and delivery processes
- Coordinate implementation for one of the solution's modules

TECH Stack:

C#; ASP.NET Web Forms; MVC; JavaScript; SQL Server; Reporting Services; Entity Framework; GIT;

Team Coordination; ## Estimation; ## Planning;

Yokogawa

Software Development Team Coordinator

January 2019 - April 2020 (1 year 4 months)

Bucharest, Romania

Challenged by the development of an engineering company, managed to successfully introduce the Software Development concept with all its processes. The following steps were taken in order to build up an Agile team capable of implementing complex projects:

- identify demands in order to determine the team required skills
- create roles profiles based on HAY and Dreyfus models
- supervise hiring process
- introduce Agile methodologies to stakeholders
- set-up Microsoft Azure DevOps as CI/CD deployment tool
- create work flows and procedures
- guide BA in user stories writing
- participate in prioritization and planning meetings
- plan sprints with the implementation team
- assure good communication and collaboration between team members
- participate in architecture design meetings
- support implementation processes in order to overcome blocking situations
- monitor and report progress and status

TECH Stack:

C#; ASP.NET MVC 5 + Razor; EntityFramework 6; SQL Server; JavaScript;
CSS; GIT;
MS Azure DevOps; ## Agile; ## Team coordination; ## Leadership; ##
Business Analysis;

ORTEC - Optimize Your World

Software Engineer

March 2018 - September 2018 (7 months)

Bucharest, Romania

- improve and fix functionalities for the extensions solution build up on Exact's Synergy.
- create documentation for the existing and required functionalities

TECH Stack:

C#; ASP.NET Web Forms;

Yokogawa

Lead Software Developer

August 2011 - June 2017 (5 years 11 months)

Bucharest, Romania

Yokogawa implements automatic safety and control systems. As a lead developer I was responsible with designing and developing new applications which integrate with Yokogawa's software systems, and has as primary goals: changes implementation and validation, tracking, logging and reporting changes.

Responsibilities (as technical lead) :

- maintain and improve legacy applications written in VB.NET,
- develop new applications with server - client components. Technologies: MVC.NET 4, EF, Razor, WCF, C#, JavaScript, Ajax, Windows Forms, Telerik controls, SQLite and others,
- code reviews for the team members,
- estimate items and tasks and define implementation plans,
- track and report activity for the team

Responsible for additional activities like:

- business analysis for the solutions, collaborations with other companies (Evonik, WAGO, ABB) to establish new standards in data transfer and integration,
- analyze requirements, write functional and technical specifications documents,
- demo and pilot solutions presentations for large audiences,
- holding up interviews for hiring developers,
- people management aspects - mentor and train junior colleagues, assure communication between members of the team,
- QA procedures definition and implementation,
- coordinating test sessions with procedures definitions, test reports templates elaboration and results centralization,
- traveled frequently to Japan, Netherlands and Germany for analysis meetings and presentations.

Gained knowledge on engineering processes, systems and standards: Yokogawa's ADSuite, Siemens Comos and other CAD systems, NAMUR standards, PLC configuration.

TECH Stack:

C#; Windows Forms; ASP.NET Web Forms; MVC; Razor; WCF; JavaScript; AJAX; SQLite; SQL Server; Reporting Services; Entity Framework; Telerik - Kendo UI; SVN;
 ## Team Coordination; ## Estimation; ## Planning; ## Reporting; ## Business Analysis; ## NAMUR; ## CAD; ## CAE; ## PLC;

Ascendis

Facilitator

January 2010 - January 2015 (5 years 1 month)

Bucharest, Romania

Facilitate and coordinate Team Building and Conference events - combine entertainment and learning within original stories and well-thought scenarios

- plan and set up environment and materials
- guide participants through activities
- debriefing and evaluation on the behavior

Team coordination; ## Event organization; ## Communication;

INTRAROM S.A.

Software Developer

July 2010 - July 2011 (1 year 1 month)

Bucharest, Romania

As a programmer in the Software Development Department :

- develop and improve an application for the management of the intern production: BOM (Bill Of

Materials) definition, parts labeling and tracking, defects reporting.

Technologies: LINQ, Enterprise

Library, SQLServer2008, COM components for processing information received through wireless

barcode scanners, Zebra technologies for barcode labeling;

- develop and implement a simple SharePoint intranet website which contains various information

for the employees. Technologies: Windows SharePoint Services 3.0, XSLT transformation for

RSS feeds, ActiveDirectory synchronization of users information into SharePoint list

TECH Stack:

C#; Windows Forms; ASP.NET Web Forms; SQL Server; Reporting Services; Enterprise Library; LINQ to SQL; Infragistics; SharePoint; TFS; ## Zebra;

Freelancer

Software Developer

July 2010 - July 2010 (1 month)

Bucharest, Romania

During 01.05.2010 and 01.07.2010, while working at CIEL, in my spare time I developed an

application for Windows Mobile 5.0 devices for a promotional campaign for PEPSI.

The application offered a graphical interface through which the users had the chance to win

prizes, store information regarding the prizes, store user information, upload data stored

through GPRS using WCF services to a SQL Server.

Develop a simple website with reports on collected data.

TECH Stack:

C#; Reporting Services; .NET Compact Framework; SQL Compact; SQL Server; Entity Framework; ASP.NET Web Forms; WCF;

Windows Mobile 5.0;

CIEL Romania

Software Developer

February 2010 - July 2010 (6 months)

Bucharest, Romania

Develop a new accounting software based on a MVP architecture using LINQ to SQL,

Dependency Injection, DevExpress.

As a programmer and analyst my responsibilities were: develop new forms for the business flows,

create validation rules, create entities based on the database structure, discuss and analyze

business flows in order to develop the user interface.

TECH Stack:

C#; Windows Forms; MVP; SQL Server; LINQ to SQL; DevExpress;

INTRAROM S.A.

Software Developer

August 2007 - February 2010 (2 years 7 months)

Bucharest, Romania

As a programmer in the Software Development Department :

Developing a large project for the national railway company.

Technologies involved in the project:

- Windows Mobile programming (Compact Framework, SQL Compact, Bluetooth Communications, Mobile Printing and Label design - Zebra Technologies);

- CAB (Composite Application Block);

- Enterprise Library;

- Entity Framework;

- .NET Framework 3.5.

Develop and improve an application for the management of the intern production: BOM (Bill Of

Materials) definition, parts labeling and tracking, defects reporting.

TECH Stack:

C#; Windows Forms; .NET Compact Framework; SQL Compact; Entity Framework 1; Enterprise Library; CAB; Infragistics; TFS;

Zebra - label design; ## Psion; ## Windows CE;

Lemonbyte

Software Developer

March 2007 - August 2007 (6 months)

Bucharest, Romania

- outsourcing for PNMsoft, developing the latest version of it's BPM (Business Process Management) application - Sequence,
- translating modules from ASP and VB into ASP.NET and C#
- interface design,
- developing application's engine based on Windows Workflow,
- developing the transformation engine for importing / exporting workflows from Windows Workflow Foundation into Sequence.

TECH Stack:

C#; Visual Basic; Windows Forms; WWF; ASP; ASP.NET Web Forms;

Axes Software

Junior Software Developer

November 2006 - February 2007 (4 months)

Bucharest, Romania

- design and develop a reporting tool based on Reporting Services 2005,
- develop a few modules of the main WMS (Warehouse Management System) application,
- implement and configure a wireless LAN based on SYMBOL TECHNOLOGIES Equipment

TECH Stack:

C#; Windows Forms; Reporting Services; SQL Server;

Zebra - label designer; ## Symbol;

Gameloft

Quality Assurance Tester

December 2005 - October 2006 (11 months)

Bucharest, Romania

- games testing and bug reporting,
- writing technical documentation for games

Education

Romanian-American University

· (September 2000 - June 2005)

Emil Botta Theoretical Highschool

High School Diploma, Informatics · (1996 - 2000)
